#### **Community**

A group of living and non-living things sharing a common purpose or space.

## or space. Systems

Diversity

All systems and places function

because of variety.

### Parts are connected through larger patterns.

#### **Cycles**

Every organism and every system goes through different stages.

#### Interdependence

All living things are connected. Every organism, system, and place depends on others.

#### Limits

Every system has a carrying capacity.

#### **Change over Time**

All organisms, places, and systems are constantly changing.

#### **Place**

Natural and human communities together make up one's place.

#### Long-Term Effects

Actions have effects beyond immediate reactions.

#### Fairness/Equity

Resources are shared to meet the needs of living things— across places and generations.

# Ability to Make a Difference

Everyone has the ability to change or impact a system, community, and themselves.

"Sustainability means doing more good than harm with the people around us and the stuff we have."

— STUDENT, SUSTAINABILITY ACADEMY, BURLINGTON, VT

#### **Equilibrium**

A state of balance.

#### SUSTAINABILITY

When the environmental, economic and social needs of a society are met in the present without compromising the ability of future generations to meet their needs.
